

Commercial or Industrial Sump/Grinder "Pump Chek" Preventative Maintenance

Coverage: Coverage will include one (1) scheduled PUMP CHEK inspection on the above equipment which is recommended twice per year. Each visit includes up to 4 hours of labor per Technician. This **excludes** all parts and applicable sales tax. Any additional manpower, equipment or work beyond the contract due to site conditions would be billed at our standard Time & Material Rate.

PUMP CHEK will renew automatically unless cancelled by the Customer or STH within 30 days of renewal date.

STH to perform the following during this service:

- * Check performance of each pump and check for overall proper installation
- * Check and record amperage draw during flow conditions
- * Check Rotation of pump if possible
- * Check and record resistance of pumps windings
- * Check Seal Annunciator Light
- * Check Heat Sensor connections
- * Check condition of Electric Control Panel
- * Check operation of check valves(s)
- * Check for leaks in piping and connections
- * Visually inspect basin and lift-out rail system for condition
- * Check level control float sequencing for operation
- * Check basin high-level alarm
- * Check Junction Box condition
- * Check pump override relay
- * Check all electrical connections at control panel
- * Check condition and test transformer and overload heaters
- * Check all status lighting
- * Check contractor or starter for pitting and chattering
